Purpose

- Interactive visualization.
- Part of the FloVis framework along with the Activity Viewer and FlowBundle.
- Visualizes Netflow traffic using an entity-based approach.
- Focuses on volumes (bytes, flows, packets).
- Provides a historical context to traffic volume patterns using a 3D graph.
Subnet 10.0.64.0/22: 2006/03/01T00 to 2006/03/31T23
Per protocol traffic from/to subnet up/down

Packets per Hour

Protocol from up, to down.
