

Why is there little/no progress?

- General Problem
 - View of threats / risks is minimized or misplaced
 - Not perceived as related to vulnerabilities or behaviors
- *Corollary*
 - don't know or understand adversaries
 - don't know how or why to play the game

Why is there little/no progress?

- Community problem
 - Very many small, serious, hard, problems
 - Fixing one or several makes no real difference
 - fixes create new problems
 - fixing is a risk factor
 - don't know where to start
- What is the proper scope for our efforts?
We have a definitional problem

Why is there little/no progress?

- Community problem
 - Lack of a common perspective
 - No common questions / hypotheses / tests
 - No measures or values for attributes
